

Kernel cgroups and namespaces: can they contribute to freedom from interference claims?

Thursday, 23 September 2021 09:50 (35 minutes)

Freedom From Interference (FFI) is a key claim that must be satisfied in functional safety systems supporting applications with mixed criticality: this session introduces cgroups and namespaces to have an open discussion on how they can contribute to FFI.

Primary authors: BENSON, Bruce (Red Hat); VERMA, Priyanka (Red Hat)

Presenters: BENSON, Bruce (Red Hat); VERMA, Priyanka (Red Hat)

Session Classification: Kernel Dependability and Assurance MC
