## **Linux Plumbers Conference 2022**

Contribution ID: 223 Type: not specified

## **GKI** experience

Tuesday, 13 September 2022 15:05 (15 minutes)

Qualcomm will provide an update on commercialization of a GKI-based target. This short talk will discuss the benefits to adopting GKI model (LTS intake frequency, upstream adoption) and some of the challenges we faced. Finally, we will discuss future challenges for GKI products with respect to upstream kernel development.

## I agree to abide by the anti-harassment policy

Yes
