Support for Control-flow Enforcement Technology

Wednesday, 14 November 2018 14:20 (20 minutes)

CET is a security enhancement technology coming in upcoming Intel hardware. This paper will talk about all the changes in the software that are required to enable CET in the marketplace. The changes are all-encompassing affecting the kernel, linker, compilers, libraries, applications etc.

I agree to abide by the anti-harassment policy

Presenter: Mr LU, H. J. (Intel)

Session Classification: Toolchain MC
