improve glibc and kernel iteration

Wednesday, 14 November 2018 15:00 (30 minutes)

- Ideas to improve glibc and Kernel interaction

This is RFC session of to check lacking kernel features glibc lacks (such as termios2), some features glibc might require to implement correctly some standards (such as pthread cancellation), and how to improve communication between kernel and gnu toolchain developers.

I agree to abide by the anti-harassment policy

Presenter: Mr ZANELLA, Adhemerval (Linaro)

Session Classification: Toolchain MC
