

LPC Networking Track

Welcome to Vancouver!

Thank You

Facebook, our networking track sponsor.

Alexei Starovoitov and Jes Sorensen.

The LPC Committee, especially Elena Zannoni

Basic Agenda

Two days of networking talks.

Yeah there's some BPF stuff...

But lots of non-BPF stuff too, for all the purists out there.

If you really like BPF, stick around for Thursday's BPF track!

For The Speakers

We have a shared laptop you can use.

Slide materials are pre-loaded.

You can use your own laptop if you want, but please test it and have it working before your timeslot. Use the early morning and break times if possible.

Our schedule is tight and packed full of awesome material, let's not waste any of it.

Technical Committee

Florian Fainelli

Daniel Borkmann

Jesper Dangaard Brouer

David S. Miller

Submitters

Thank you for all of your submissions, there were a lot!

Having too much is as difficult as having too few.

Submitted slides and papers will be put online afterwards at:

<http://vger.kernel.org/lpc-networking.html>

Feedback

Submissions were a black hole.

We will make explicit ACKs in the future, for sure.

Some public web page to monitor review status would be nice.

Definitely we will look into that.

Submission deadline was a bit too early.

We agree!
