LINUX PLUMBERS CONFERENCE

August 24-28, 2020

Hi, we're libcamera.

An open source camera stack and framework for Linux, Android, and ChromeOS

[Getting Started](#)

**LINUX
PLUMBERS
CONFERENCE**

August 24-28, 2020

Since last year

- Raw capture
- Multi stream (with JPEG and raw) in Android camera HAL
- Hotplug, stable IDs, friendly names*
- GStreamer element, V4L2 emulation
- Documentation
- Reprocessing API*
- IPC isolation for Image Processing Algorithms*
- Lots of behind-the-scenes work (core helpers, Linux kernel, ...)

(* in progress)

And by the way...

Support for Raspberry Pi ...

... with world's first **fully free software** image processing algorithms (3A) and camera tuning tool*

<http://libcamera.org/entries/2020-05-05.html>

* to our knowledge – come and talk to us about it

**LINUX
PLUMBERS
CONFERENCE**

August 24-28, 2020

Integration with Android

- The Android camera HAL has been tested on Chrome OS only so far
- Time to move to Android

LINUX
PLUMBERS
CONFERENCE

August 24-28, 2020

Challenges

- Target hardware platform(s) (hardware support, mainline kernel, market relevance, ...)
- Build system integration (join in 2h for “Integrating open source packages into AOSP”)
- Shipping in AOSP – Cuttlefish and/or real hardware?
